

Done. Here is the **cleaned-up master feature list** based on your final decisions in the uploaded document. I've kept the same structure and priorities rather than adding new features that you didn't approve.

☐ Business AI Robot — Final App Feature List

A. Dashboard

ID	Feature	Priority
A1	Business dashboard	● Must
A2	Today's sales summary	● Must
A3	Today's orders/transactions	● Must
A4	Pending payments summary	☐ Useful
A5	Low-stock alerts	● Must
A6	Important notifications	● Must
A7	Robot online/offline status	● Must
A8	Quick AI assistant button	● Must

☐ B. AI Assistant

ID	Feature	Priority
B1	✕ Text chat with AI — REMOVED	—
B2	Voice conversation + robot speaking-language selection	● Must
B3	Robot responds only when its robot name is spoken	● Must
B4	Ask business questions	● Must
B5	AI business recommendations using uploaded business-instruction .txt file; app provides upload option	☐ Useful
B6	AI remembers business context	● Must
B7	AI activity/history	☐ Useful

ID	Feature	Priority
B8	Multilingual support	☐ Useful
B9	AI personality/custom responses	☐ Optional

Your .txt instruction-file idea is especially useful because it gives the owner a way to configure how the AI should understand and operate within **that particular business**.

C. Voice

ID	Feature	Priority
C1	Push-to-talk	● Must
C2	Wake word / robot-name activation	☐ Useful
C3	Speech-to-text	● Must
C4	Text-to-speech	● Must
C5	Hindi voice	☐ Useful
C6	Marathi voice	☐ Useful
C7	English voice	● Must
C8	Voice volume/settings	☐ Optional

D. Inventory

ID	Feature	Priority
D1	Product list	● Must
D2	Add product using barcode	● Must
D3	Edit product	● Must
D4	Delete product	☐ Useful
D5	Add stock	● Must

ID	Feature	Priority
D6	Reduce stock	● Must
D7	Current stock	● Must
D8	Minimum-stock level	● Must
D9	Low-stock alert	● Must
D10	Stock history	□ Useful
D11	Supplier information	□ Useful
D12	Purchase history	□ Useful
D13	Automatic reorder suggestion	□ Useful
D14	Barcode/QR scanning	□ Future

□ E. Billing

ID	Feature	Priority
E1	Create bill	● Must
E2	Add products to bill	● Must
E3	Automatic total calculation	● Must
E4	Tax/GST calculation	□ Useful
E5	Discount	□ Useful
E6	Generate invoice	● Must
E7	Print invoice	□ Useful
E8	PDF invoice	□ Useful
E9	Send invoice digitally	□ Useful
E10	Billing history	● Must
E11	Cancel/refund bill	□ Useful
E12	AI voice billing only through robot	● Must

F. Customers

ID	Feature	Priority
F1	Customer list	● Must
F2	Add customer	● Must
F3	Edit customer	● Must
F4	Customer purchase history	☐ Useful
F5	Customer pending balance	● Must
F6	Customer payment history	☐ Useful
F7	Customer notes	☐ Optional
F8	Top customers	☐ Useful
F9	Customer preferences	☐ Optional
F10	AI customer insights	☐ Useful

G. Payments

ID	Feature	Priority
G1	Record payment	● Must
G2	Pending payments	● Must
G3	Payment history	● Must
G4	Customer outstanding balance	● Must
G5	Payment reminder	☐ Useful
G6	Online payment integration	☐ Future
G7	Automatic payment reconciliation	☐ Future

☐ H. Tasks & Reminders

ID	Feature	Priority
H1	Create reminder	● Must
H2	View reminders	● Must
H3	Complete/delete reminder	● Must
H4	Recurring reminders	□ Useful
H5	Voice-created reminders	● Must
H6	Due-task notifications	● Must
H7	AI suggests reminders	□ Useful
H8	AI learns repeated routines	□ Future

I. Reports & Analytics

ID	Feature	Priority
I1	Daily sales report	● Must
I2	Weekly sales report	● Must
I3	Monthly sales report	□ Useful
I4	Profit report	□ Useful
I5	Product sales report	□ Useful
I6	Inventory report	● Must
I7	Customer report	□ Useful
I8	Pending payment report	● Must
I9	AI-generated business summary	● Must
I10	AI business recommendations	□ Useful
I11	Charts/graphs	□ Useful
I12	Export reports	□ Optional

⚡ J. Robot Hardware

ID	Feature	Priority
J1	Robot online/offline	● Must
J2	Relay control	● Must
J3	Relay status	● Must
J4	Voice → relay control	● Must
J5	Robot microphone status	● Must
J6	Robot speaker status	● Must
J7	OLED status	□ Useful
J8	Hardware diagnostics	□ Useful
J9	Remote robot control	□ Useful
J10	Firmware update	□ Future

📱 K. WhatsApp / Customer Communication

ID	Feature	Priority
K1	Send invoice	□ Useful
K2	Payment reminder	□ Useful
K3	Order confirmation	□ Useful
K4	Customer inquiry handling	□ Useful
K5	AI-generated replies	□ Useful
K6	Promotional messages	□ Optional
K7	Automated WhatsApp workflows	□ Future

🔄 L. Automation

ID	Feature	Priority
L1	Low stock → alert	● Must
L2	Sale → inventory update	● Must
L3	Bill → customer history update	● Must
L4	Payment → balance update	● Must
L5	Due reminder → notification	□ Useful
L6	Daily closing automation	□ Useful
L7	Automatic purchase list	□ Useful
L8	AI-created workflows	□ Future
L9	Custom IF/THEN automation	□ Future

M. Owner / Staff Management

ID	Feature	Priority
M1	Owner account	● Must
M2	Staff accounts	□ Useful
M3	Roles & permissions	● Must
M4	Activity log	□ Useful
M5	AI permission control	● Must
M6	Multiple users	□ Useful
M7	Multiple shops/branches	□ Future

N. Security

ID	Feature	Priority
N1	Login	● Must
N2	Owner authentication	● Must

ID	Feature	Priority
N3	AI action confirmation	● Must
N4	Permission system	● Must
N5	Business data backup	● Must
N6	Audit/activity log	□ Useful
N7	Sensitive-action PIN	□ Useful

⚙️ O. Settings

ID	Feature	Priority
O1	Business profile	● Must
O2	Product settings	● Must
O3	Voice/language settings	□ Useful
O4	AI settings	● Must
O5	Notification settings	□ Useful
O6	Robot settings	● Must
O7	User management	□ Useful
O8	API/integration settings	□ Future

★ P. Special / Unique Features

These are the features that define the **Business AI Robot**, rather than just making it another shop-management app.

ID	Feature	Priority
P1	Talk naturally to business AI	● Must
P2	Voice → business action	● Must
P3	Voice → physical robot action	● Must

ID	Feature	Priority
P4	AI understands business context	● Must
P5	AI proactively alerts owner	● Must
P6	AI learns recurring business patterns	□ Future
P7	One command updates multiple systems	● Must
P8	AI explains business performance	□ Useful
P9	AI recommends next business action	□ Useful
P10	Robot + App + Backend share one brain	● Must

🔥 Final count

15 categories → 100+ individual feature points, divided into:

- **Must** — core product
- **Useful** — strong additions
- **Optional/Future** — don't let these slow V1

One thing I would **not** do now is start implementing these 100+ features. The next step should be to turn this into a **V1 → V2 → V3 development roadmap**, so we know exactly what we're building first and what waits until later.
